

WHAT TO DO IN THE EVENT OF A CANOPY COLLISION/ENTANGLEMENT

Stay calm

Check the problem

- are you entangled?
- is your canopy still inflated?
- can you untangle yourself?

Communicate and listen; make sure that others are aware of your intentions and you of theirs

Check your altimeter or ask the other jumper the height

If you are able to cutaway without making the problem worse for the other jumper, then make sure that you have clear skies below

Stay safe
